

WALT: To be able to write numbers 1–20.

: To be able to recognise numbers 1-20.

: To be able to order numbers 1-20.

Wednesday 25th March 2020.

Step 1: If your child is able to they can write numbers onto a piece of paper which can then be cut out to make number cards. If not an adult can write the numbers. (Your child could practise their scissor skills when making the numbers into cards.)

Step 2: See how many of the numbers your child can recognise (if only up to 10 for example then just concentrate on these numbers for now).

Step 3: See how many of the numbers they can put in the right order.

Step 4: Say the numbers in the right order.

Step 5: Save your cards as we are going to use them for an activity tomorrow!
