

WALT: To be able to count with 1:1 correspondence.

Thursday 26th March 2020

Using the number cards that you made yesterday, get your child to see if they can recognise the numbers again. You could place them on the floor and they have to jump to a number and say its' name. Next, get some objects (this could be anything they enjoy playing with e.g. dinosaurs, lego, playdough etc) and your child has to put the right number of objects onto the number cards. Enjoy and we hope you are having lots of fun with your learning!
