

### Times Table Challenge

7.5.20

Today Green Class, I am setting you (another) challenge!

Your task is to create **your own activity** which incorporates both the FOUR and EIGHT Times Tables. This means the multiplication and the answer.

Think about how you enjoy learning...

Do you prefer:

Being physical e.g. playing with a ball or skipping? You could recite the times tables while you play and maybe an adult could film you doing this

Art? Why not draw a picture with the times table incorporate (e.g. colour by number) and then send me a picture of your completed work.

Music? You could create a song (maybe to the melody of your favourite song) which incorporates the Times Tables.

Whatever you decide to do, the most important thing is that this task is going to help you remember your Four and Eight Times Tables, so pick what works best for you. But it must include the times table and the answer e.g.  $4 \times 8 = 32$

Don't forget to send me an example of your creation to [green@margaretroper.croydon.sch.uk](mailto:green@margaretroper.croydon.sch.uk)

Who said Maths couldn't be FUN?!
