

Orange Class Project: Toy Designers.

Week beginning 29.06.20

Hello Orange Class! I hope you all have had a lovely weekend and been playing lots 😊. This week for your project, you are going to be becoming toy designers. You will be designing your own toys before creating the final toy using different materials you have at home. The design is your own choice so you can use your toys and your ideas for inspiration. You can design and create anything from a spinning top to a marble maze. Have fun creating 😊. When finished, you can email me your creations at: orange@margaretroper.croydon.sch.uk

I have included some pictures and a link to help with toy ideas.

Activity 1: Using the designing sheet, draw the design of the toy you wish to create. Once drawn, label the different parts of the toy and the materials you are going to use to create the toy.

Activity 2: Time to create your toy. Remember to try and use your design and materials from activity 1. Remember to use materials you can find around the house and recycle such as cardboard tubes and paper.

Here are pictures to help with your ideas:

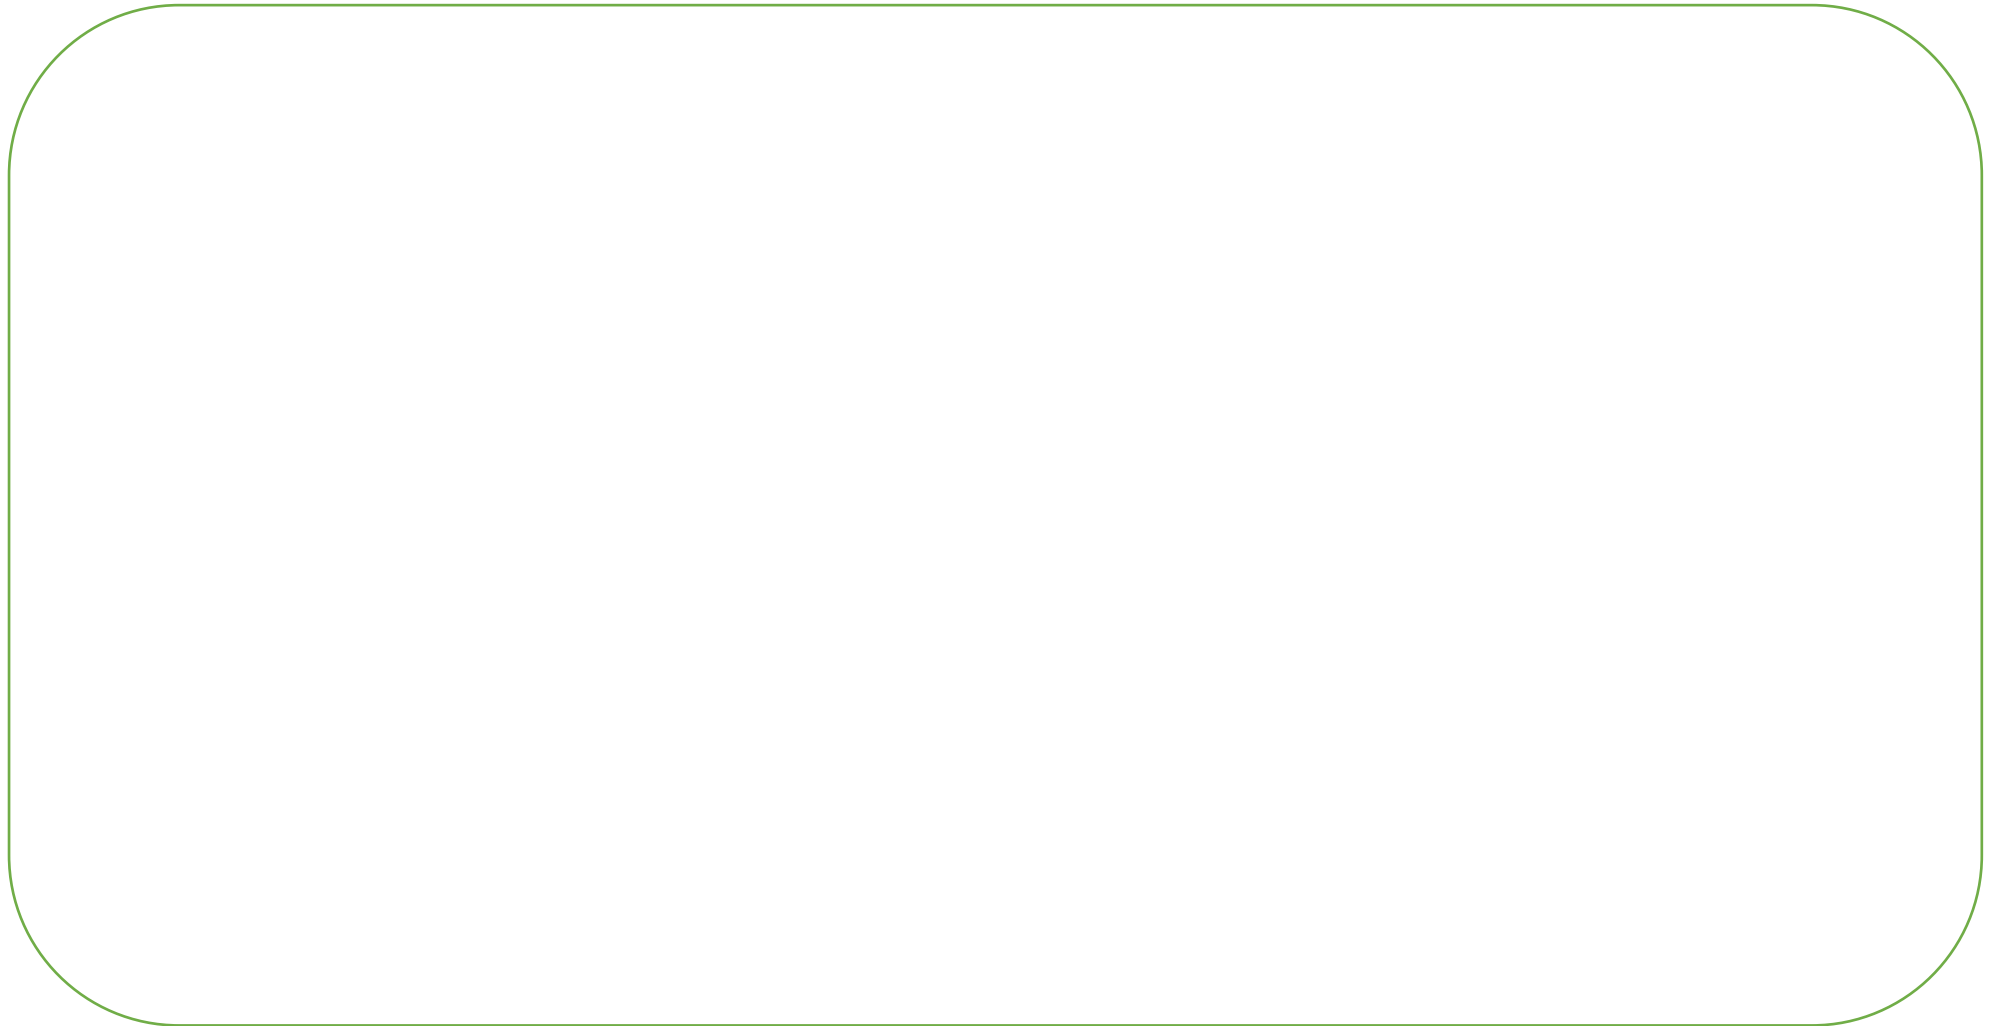

Here is a link to some ideas on Pinterest:
