

Year 5 Art Project 3 Instructions

Look on the slides at the different examples of how artists have shown movement, including the overlapping of shapes, blurring of lines and flowing lines. What effects do these techniques create? Which do you like the best? Why?

Choose one of the artworks that you like that shows movement and emulate (copy) the technique the artist has employed.

You can use the picture cards to emulate the various techniques shown.

As an extra challenge, you could annotate these sketches, explaining what you used/did.
