

Dear Children ,

I hope you are well and up for some computing fun this summer:)

I have prepared a few interesting activities that you can either do on your own or with the help of your parents/ siblings.

I hope you enjoy the tasks and tell me all about it in September.

Have a lovely summer,

Mrs Brotherton

Create a short movie by editing and combining a series of short videos . You will have to ask your parents' permission to use their phone/ camera.

Code a cartoon!

1. Go to this site: <https://scratch.mit.edu/studios/1891366/>
2. Press the **create** button.
3. Press the **tutorial** button (this will take you to the world of different computing projects including making your own games and animations!)
4. Press the **code a cartoon** button and watch the tutorials on how to bring characters to life by coding your own animations!
5. Enjoy the process!
6. Try another project :)

Create a digital poster for something you want to advertise using Publisher, Word, PowerPoint or other digital media.

Dear Parents/ Carers,

Please make sure to supervise your child at all times when they are working online. Thank you!
