

WALT: To use language to describe length.

Thursday 9th July

Warm up, Watch: <https://www.youtube.com/watch?v=OqhVCellIOSs> -
NUMBERJACKS | Measured Response | S2E6

Today we are going to continue learning about length. Firstly, you will need to draw around your foot and cut it out so that you have a foot shape. Next I would like you to measure some items around your home or garden and tell your adult how many foot lengths it was. For instance, I measured my rug and it was 5 foot lengths long. Then can you write down or draw some of the items you measured in order of their length from shortest to longest. For instance;

Rug 5 foot lengths long

Table 7 foot lengths long

Sofa 10 foot lengths long

Finally, you can complete the worksheet 'Ordering Caterpillar Lengths'.
