

Year 5 Art Project 5 Instructions

Think about the montage you created yesterday. What shapes worked best? How were colour and shape used to create different effects?

Look through today's slides showing string printing. How could this be used to give the illusion of movement?

Today, you will need card, string and glue to create your print press in the shape of a person in motion to make your movement art.

As an extra challenge, can you use colour to enhance your work?
